

Password Protection

Dear Partners,

Privacy and data protection is a growing priority in business worldwide. We take data protection very seriously and, as a result, we will be implementing password protection on all of our policy documents as of 1 May 2021.

Please take note of our password structure to be sure you enter the correct password to open the documents that we send.

STEP 1

Insert the client's date of birth in this format:
YYYYMMDD

STEP 2

Then insert the first letter of the client's first given name (in capitals)

STEP 3

Lastly, insert the first letter of the client's family name (in capitals)

For example, if your client is William Smith, born on 25 June 1970, the password for his documents would be **19700625WS**.

PLEASE NOTE

In the case of documents provided for Joint Life policies, the password will always be based on the First Life's name and date of birth.

Please don't hesitate to get in touch should you have any queries or need assistance.
